Tree Requirements

1. Minimum size for all boulevard trees is 1.25" caliper, all trees must be single stem
2. Only trees on this approved list may be planted in the boulevard
3. Upon receiving the tree planting permit, the Forestry Department will mark/stake the locations where the trees have to be planted, locations will be marked within one week
4. Spacing: standard spacing requires trees to be located 40 feet back from an intersection, 25 feet between trees, 12 feet from a driveway and a minimum of 10 feet from hydrants and streetlights (see below)

Typical Residential Property Spacing
